TEST REPORT

Client Name : ShenZhen EBELONG Technology Co., Ltd.

Address : 4th Floor, Building No.2, Hengmingzhu shajing Industrial Park,
Xiangxing Road, Bao'an District, ShenZhen GuangDong China.

Product Name : Wireless Controller

Test Model No. : ERC902

Report No. : CCTI-2025010314-3E

Issued Date : Jan. 08, 2025

Prepared By : Shenzhen CCTI Technology Co., Ltd.

Address : 7th Floor, Block A, Building E, Yongwei Industrial Park, No. 118,
Yongfu Road, Qiaotou, Fuhai Street, Bao'an District, Shenzhen,
Guangdong, China

TEST REPORT VERIFICATION

Applicant : ShenZhen EBELONG Technology Co., Ltd.

Address : 4th Floor, Building No.2, Hengmingzhu shajing Industrial Park, Xiangxing Road,
Bao'an District, ShenZhen GuangDong China.

Manufacturer : ShenZhen EBELONG Technology Co., Ltd.

Address : 4th Floor, Building No.2, Hengmingzhu shajing Industrial Park, Xiangxing Road,
Bao'an District, ShenZhen GuangDong China.

Product Name : Wireless Controller

Model No. : ERC902

Series No. : ERC901, ERC903, ERC904, ERC905, ERC906, ERC907, ERC908

Trade Mark : N/A

Rating(s) : Input: AC184-264V; 50/60Hz; 3A
Load: 500W

Test Date : Jan. 02, 2025 to Jan. 08, 2025

Test Standard(s) : EN 62479:2010
EN 50665:2017

Test Result : PASS

This device described above has been tested by CCTI, and the test results show that the equipment under test (EUT) is in compliance with the 2014/53/EU RED Directive Art.3.1(a) requirements. The results shown in this test report refer only to the sample(s) tested unless other wise stated and the sample(s) are retained for 30 days only.

The document is issued by CCTI, may be altered or revised by CCTI, personal only, and shall be noted in the revision of the document. this document cannot be reproduced except in full with our prior written permission.

1. GENERAL INFORMATION

1.1 GENERAL DESCRIPTION OF EUT

EUT Name	: Wireless Controller
Model No.	: ERC902
Series No.	: ERC901, ERC903, ERC904, ERC905, ERC906, ERC907, ERC908
Model Difference	: The product is different for model number.
Trademark	: N/A
Power supply	: Input: AC184-264V; 50/60Hz; 3A Load: 500W
Operation frequency	: 433.92MHz
Max. RF output power	: 3.34dBm
Modulation	: FSK
Antenna Type	: Internal antenna
Intend use environment	: Residential, commercial and light industrial environment

Remark:

- (1) ERC902 was selected as the test model and the datas have been recorded in this report.
- (2) For a more detailed features description, please refer to the manufacturer's specifications or the User's Manual.

Note: This test report is issued for the purpose of Co-license.

This report is based on report CCTI-2022101904-3E, the new models ERC902 in Co-license are the same as original models ERC902 mentioned in test report CCTI-2022101904-3E, no further test need.

2. EN 62479 & EN 50663 REQUIREMENT

2.1 GENERAL INFORMATION

According to its specifications, the EUT must comply with the requirements of the following standards:

EN 62479: 2010 [Assessment of the compliance of low power electronic and electrical equipment with the basic restrictions related to human exposure to electromagnetic fields (0 MHz to 300 GHz)]

EN 50663:2017 [Generic standard for assessment of low power electronic and electrical equipment related to human exposure restrictions for electromagnetic fields (10 MHz-300GHz)]

2.2 LIMIT

A. Typical usage, installation and the physical characteristics of equipment make it inherently compliant with the applicable EMF exposure levels such as those listed in the bibliography. This low-power equipment includes unintentional (or non-intentional) radiators, for example incandescent light bulbs and audio/visual (A/V) equipment, information technology equipment (ITE) and multimedia equipment (MME) that does not contain radio transmitters.

NOTE: Equipment is described as A/V equipment, ITE or MME if its main use is playback / recording of music, voice or images, or processing of digital information.

B. The input power level to electrical or electronic components that are capable of radiating electromagnetic energy in the relevant frequency range is so low that the available antenna power and/or the average total radiated power cannot exceed the low-power exclusion level defined in 4.2.

C. The available antenna power and/or the average total radiated power are limited by product standards for transmitters to levels below the low-power exclusion level defined in 4.2.

D. Measurements or calculations show that the available antenna power and / or the average total radiated power are below the low-power exclusion level defined in 4.2.

3. RESULT

PASS

The available antenna power of this EUT is 3.54mW (3.34 dBm), the power are below the low-power exclusion level defined in 4.2(Pmax: 20mW)."

***** END OF REPORT *****
